## Alternative solutions for the single-use plastics that are banned

### Straws

Reduce or eradicate the use of straws completely. If necessary, choose reusable: metal, bamboo, glass, or single-use: paper, wheat, pasta.

### Drink stirrers

Avoid using drink stirrers. If this is not possible, select reusable metal or wooden ones, or simply use a spoon.

### Cutlery

Choose reusable metal or bamboo cutlery, or single-use wooden ones.

### Plates

Get stainless steel or reusable plastic plates that do not break.

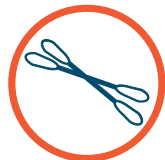

### Cups

Choose the reusable cup that suits you and even save money when you buy coffee.

### Food containers

Bring your own reusable container with you when you buy food to go.

### Cotton earbuds

Use cotton earbuds with a wooden, paper or bamboo base.

### Balloon holders

Make your own alternative decorations for parties and events using paper, leaves, ribbon, plants, rope, etc.

### Oxo-degradable items

Look beyond short-term, superficial alternatives and invest in real sustainable solutions.
